

Punch & Die Cutter

Code: P.501.xxx

Usage

To prepare sample strips for e.g. tensile tests.

Device description

The sturdy punch & die cutter is fully made of metal and is equipped with a feeder table, a hand lever for easy operation and a strip pan. The upper and lower premium blade guarantees precise cutting and accurate sample strips.

Process description

The sample material is placed on the feeder table and supported by the feeder edges. By pushing the hand lever down, the sample is clamped automatically and a safety guard covers the punching unit to ensure safe operation. The sample strips fall through the lower part of the device and are collected on a metal sample pan for fast and easy access to the samples.

Models

Code	Sample size
P.501.315	300 x 15 mm
P.501.325	300 x 25 mm
P.501.350	300 x 50 mm
P.501.050	50 x 50 mm square
P.501.115	100 x 15mm
P.501.612	6 inch x ½ inch
P.501.615	6 inch x 15 mm
P.501.701	7 inch x 1 inch
