

The lever operated TSA750 is ideal for quick-action testing of up to 750 lbF of tensile or compressive force. Made of rugged components, this test stand is durable enough for the factory floor, yet precise enough for laboratory environments. The loading lever can be positioned in 30° increments and the adjustable precision ground rack and pinion mechanism assures smooth, precise motion through 6 in of travel. The test stand includes adjustable travel stops and a frictional low force brake. It is available in vertical and horizontal orientations. Use this test stand with Mark-10 force gauges and gripping fixtures to create a complete push/pull testing system.

Specifications

Load capacity:	750 lbF [3750 N]
Maximum travel:	
With travel stops:	2.75 in [69.9 mm]
Without travel stops:	6 in [152.4 mm]
Loading method:	Rack and pinion, lever can be positioned in 30° increments
